

ARS Risk Reduction Review Services are Performed for Risk Managers, Safety Directors and Other Senior Management of Client Companies that are for the Most Part Self-Insured.

The Reviews are conducted in the same manner that an expert witness would review a case during their preparation for court. The Reviews identify the problems producing loss or exposure to regulatory issues and suggest the most effective remedy. During the review, every effort is made to help the local management understand how to manage their safety and regulatory programs. After each review there is a detailed report developed that covers all the review findings, measures each segment and sets up a workable action plan. This allows the client to track their progress and use the results in their management's standards of performance and in their periodic performance reviews. All reviews begin with an opening conference to discuss the review strategy with local management and ends with a closing conference to discuss the review findings. Each ARS Risk Reduction Reviews™ is tailored for the client and usually consists of a combination of one or more of the following types of reviews.

#### Accident Prevention and Related Cost Reduction:

- Vehicle Accidents
- Injury Accidents
- Property Loss

#### Regulatory Compliance:

- Department of Transportation (DOT)
- Occupational Safety and Health (OSHA General and Construction)
- Americans with Disabilities Act Title III (ADA)
- Process Safety Management (OSHA and EPA)
- Environmental Protection Agency (EPA)

#### Vehicle Maintenance Program Reviews:

- Preventive Maintenance (PM) Program
- Driver Vehicle Inspection Reports (DVIR) Program
- Department of Transportation (DOT) Compliance
- Physical Condition of Vehicles
- Shop Safety and Occupational Safety and Health Act (OSHA)

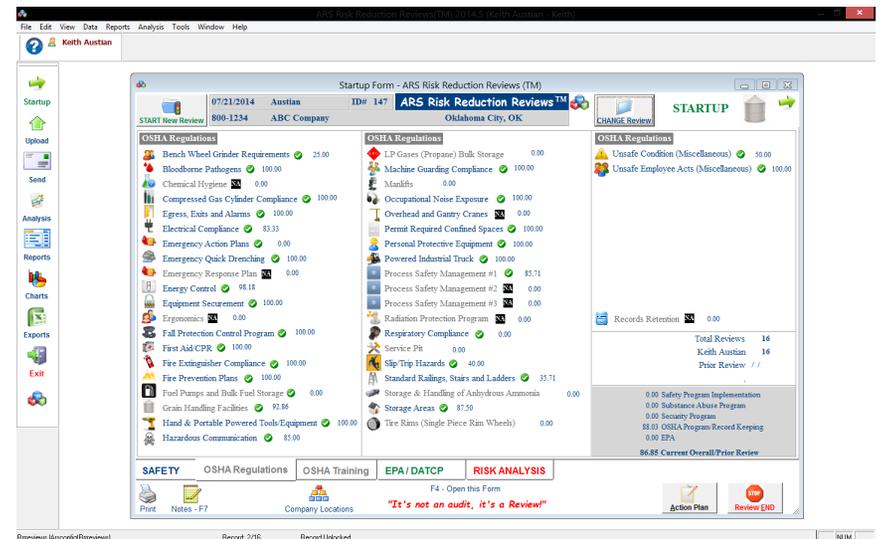

# ARS Risk Reduction Reviews™

DOT ▪ OSHA ▪ EPA ▪ ADA

ARS Risk Reduction Reviews™ is the most effective/powerful tool to train a company's safety and operation's management team so they can fully comprehend their internal safety program and regulatory compliance requirements.
